

# ENGEL heater insulating jacket

**ENGEL heater insulating jacket**  
**Effective, simple and less costly**

**ENGEL heater insulating jackets = many advantages:**

- > **Up to 40% savings in heating energy costs**
- > **Increased lifetime of heating elements (due to less cycles of operation)**
- > **Setup costs are quickly recouped (ROI)**
- > **Shortened heating time**
- > **Lowered surface temperature of the plast unit**
- > **Improved climate in the machine hall (without cooling)**
- > **Reduced CO<sup>2</sup> consumption = reduced environmental impact**

Important notice:

Applications where the melt creates high internal warming or that have to be cooled during normal operating, are not or only in some areas (feed section) recommended for this insulation.
