

ENGEL Names Adams Engineers To Represent Western U.S. Region

YORK, Pa. – Jan. 8, 2010 – Adams Engineers & Equipment, Inc., distributor of a full range of plastic processing equipment, has become the newest representative of ENGEL North America products. The company will work with ENGEL customers in the Southwestern U.S. and northern Mexico.

ENGEL North America, a world leader in the design and manufacture of injection molding machines and part-handling automation systems, has added Adams Engineers & Equipment, Inc., Tyler, Texas, to its rep group team. Adams Engineers will handle sales to ENGEL customers in Texas, Oklahoma, Arkansas and Louisiana in the U.S., and in the northern Mexican state of Tamaulipas.

Established in 1991, Adams Engineers is a technology-driven organization that provides a range of engineering services and plastic processing equipment used in injection molding, extrusion, blow molding, thermoforming and plastic products decorations. The company assists manufacturers with economic justification, process improvement, plant layout, project management, equipment installation supervision and asset management. “Our company is on the same page philosophically as ENGEL,” explained Cliff Adams, president of Adams Engineers. “We are dedicated to providing our customers the additional services they need to incorporate equipment and technology into their operations. ENGEL has the technology, as well as application-specific and market-specific technology that are so necessary today.”
